GERMAN HEAVY TANK "TIGER" No. 131

PAPER MODEL FROM THE «PAPER ARMY»

HISTORICAL REFERENCE

The German heavy tank Tiger with turret number 131, now the most famous "Tiger" in the world, is an active exhibit of the museum in Bovington (Great Britain). Tiger 131 was captured in North Africa during the Allied offensive against Tunisia in 1943. During the battles, the 131st Tiger was assigned to the 3rd platoon of the 1st company of the 504th battalion and went into battle at the Jebel Jaffa pass. The tank received several hits in the turret, the crew was injured and the turret jammed, after which the German crew abandoned almost an entire tank. After the capture, the tank was examined and sent to

England, where it still pleases its spectators at armored vehicle races on the territory of the museum, the good fate of the tank.

WHAT IS THE TANK TAKEN FOR THE BASIS OF THE PAPER MODEL?

The model is a copy of the Tiger 131, the paper tank is presented as it was before the battle (without any damage). The model has the same number "131", unit marks on the right and left of the tank (on the sides, closer to the front), the first version of the undercarriage, a piece of caterpillar on the frontal armor and a step for easy boarding into the tank, filters "fayfel", the first caterpillar sample and so on.

PRINTING INSTRUCTIONS

To print a model of a tank, you need to select sheets of a document with a template, printing is carried out on A4 sheets (international format, 210 by 297 mm), if you have a different paper size, it's okay, you can print on it, the main thing in this case is do not stretch on the whole sheet (violation of the aspect

ratio of the sheet), since this will change all the dimensions of the model, if, when printing on a different format, it turns out that there is an empty space on the sheet - let it remain, if the model is reduced in size, this is also not scary, there will be changes insignificant.

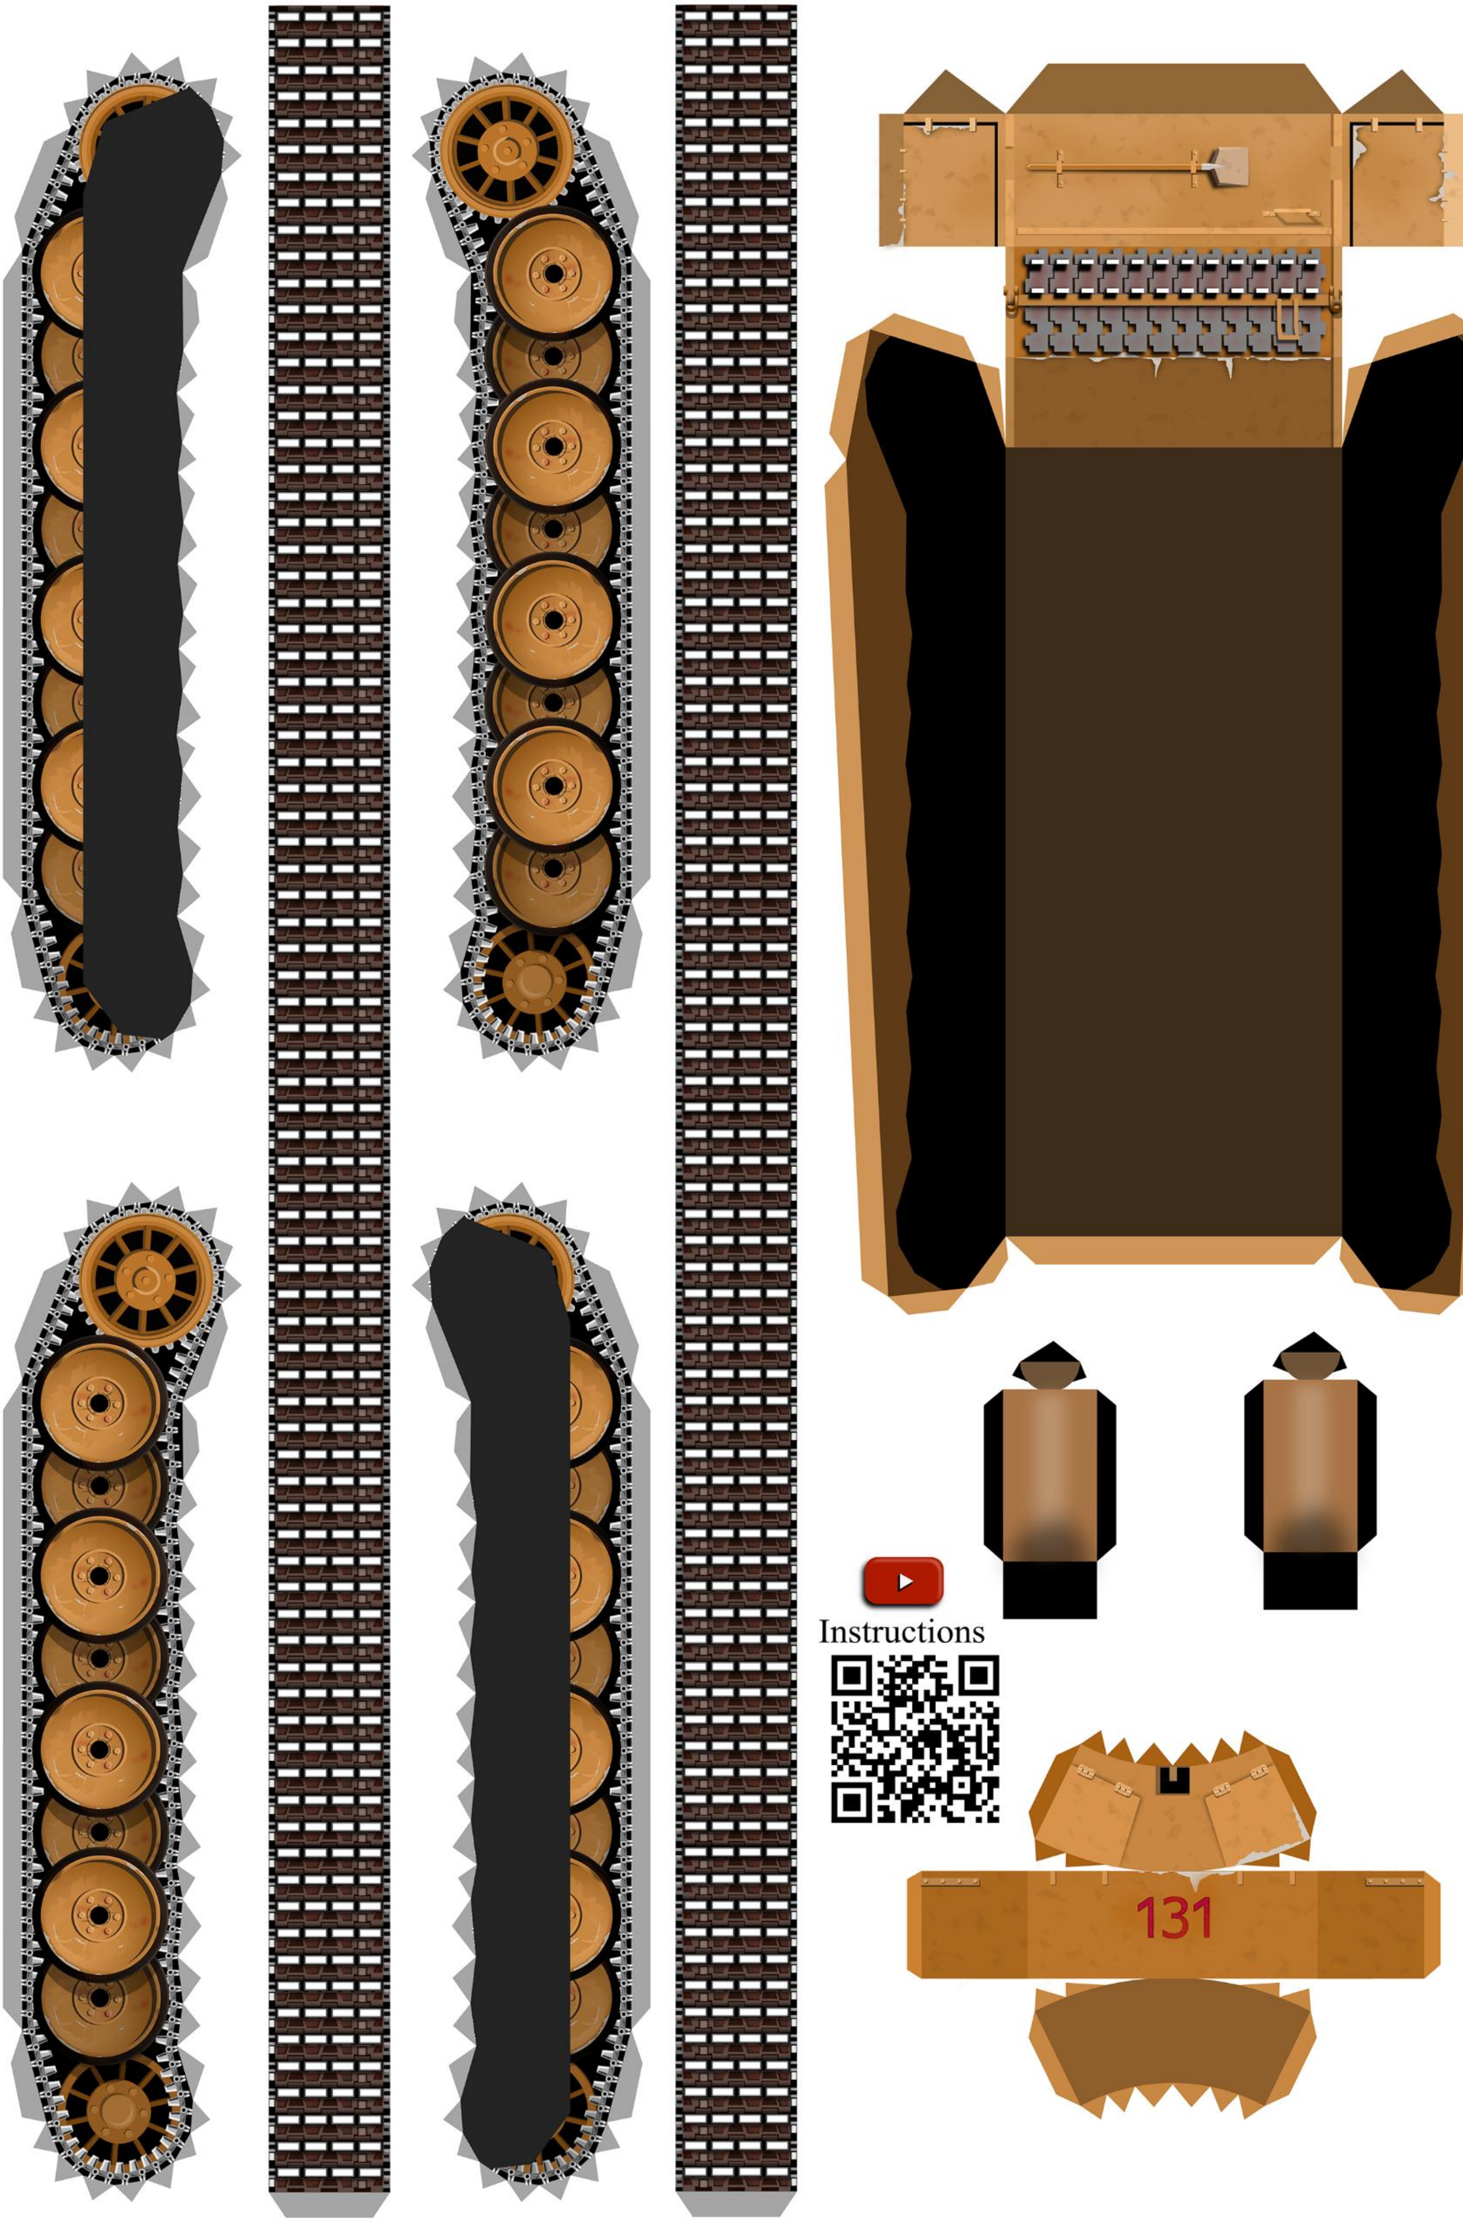

CUTTING AND GLUING INSTRUCTIONS

For all models, a separate video assembly instruction is provided, this video is available on my "Paper Army" YouTube channel at this link – "How to make Paper tank Tiger 131" (Rights reserved, commercial use is prohibited, deposit has been made).

FRIENDS

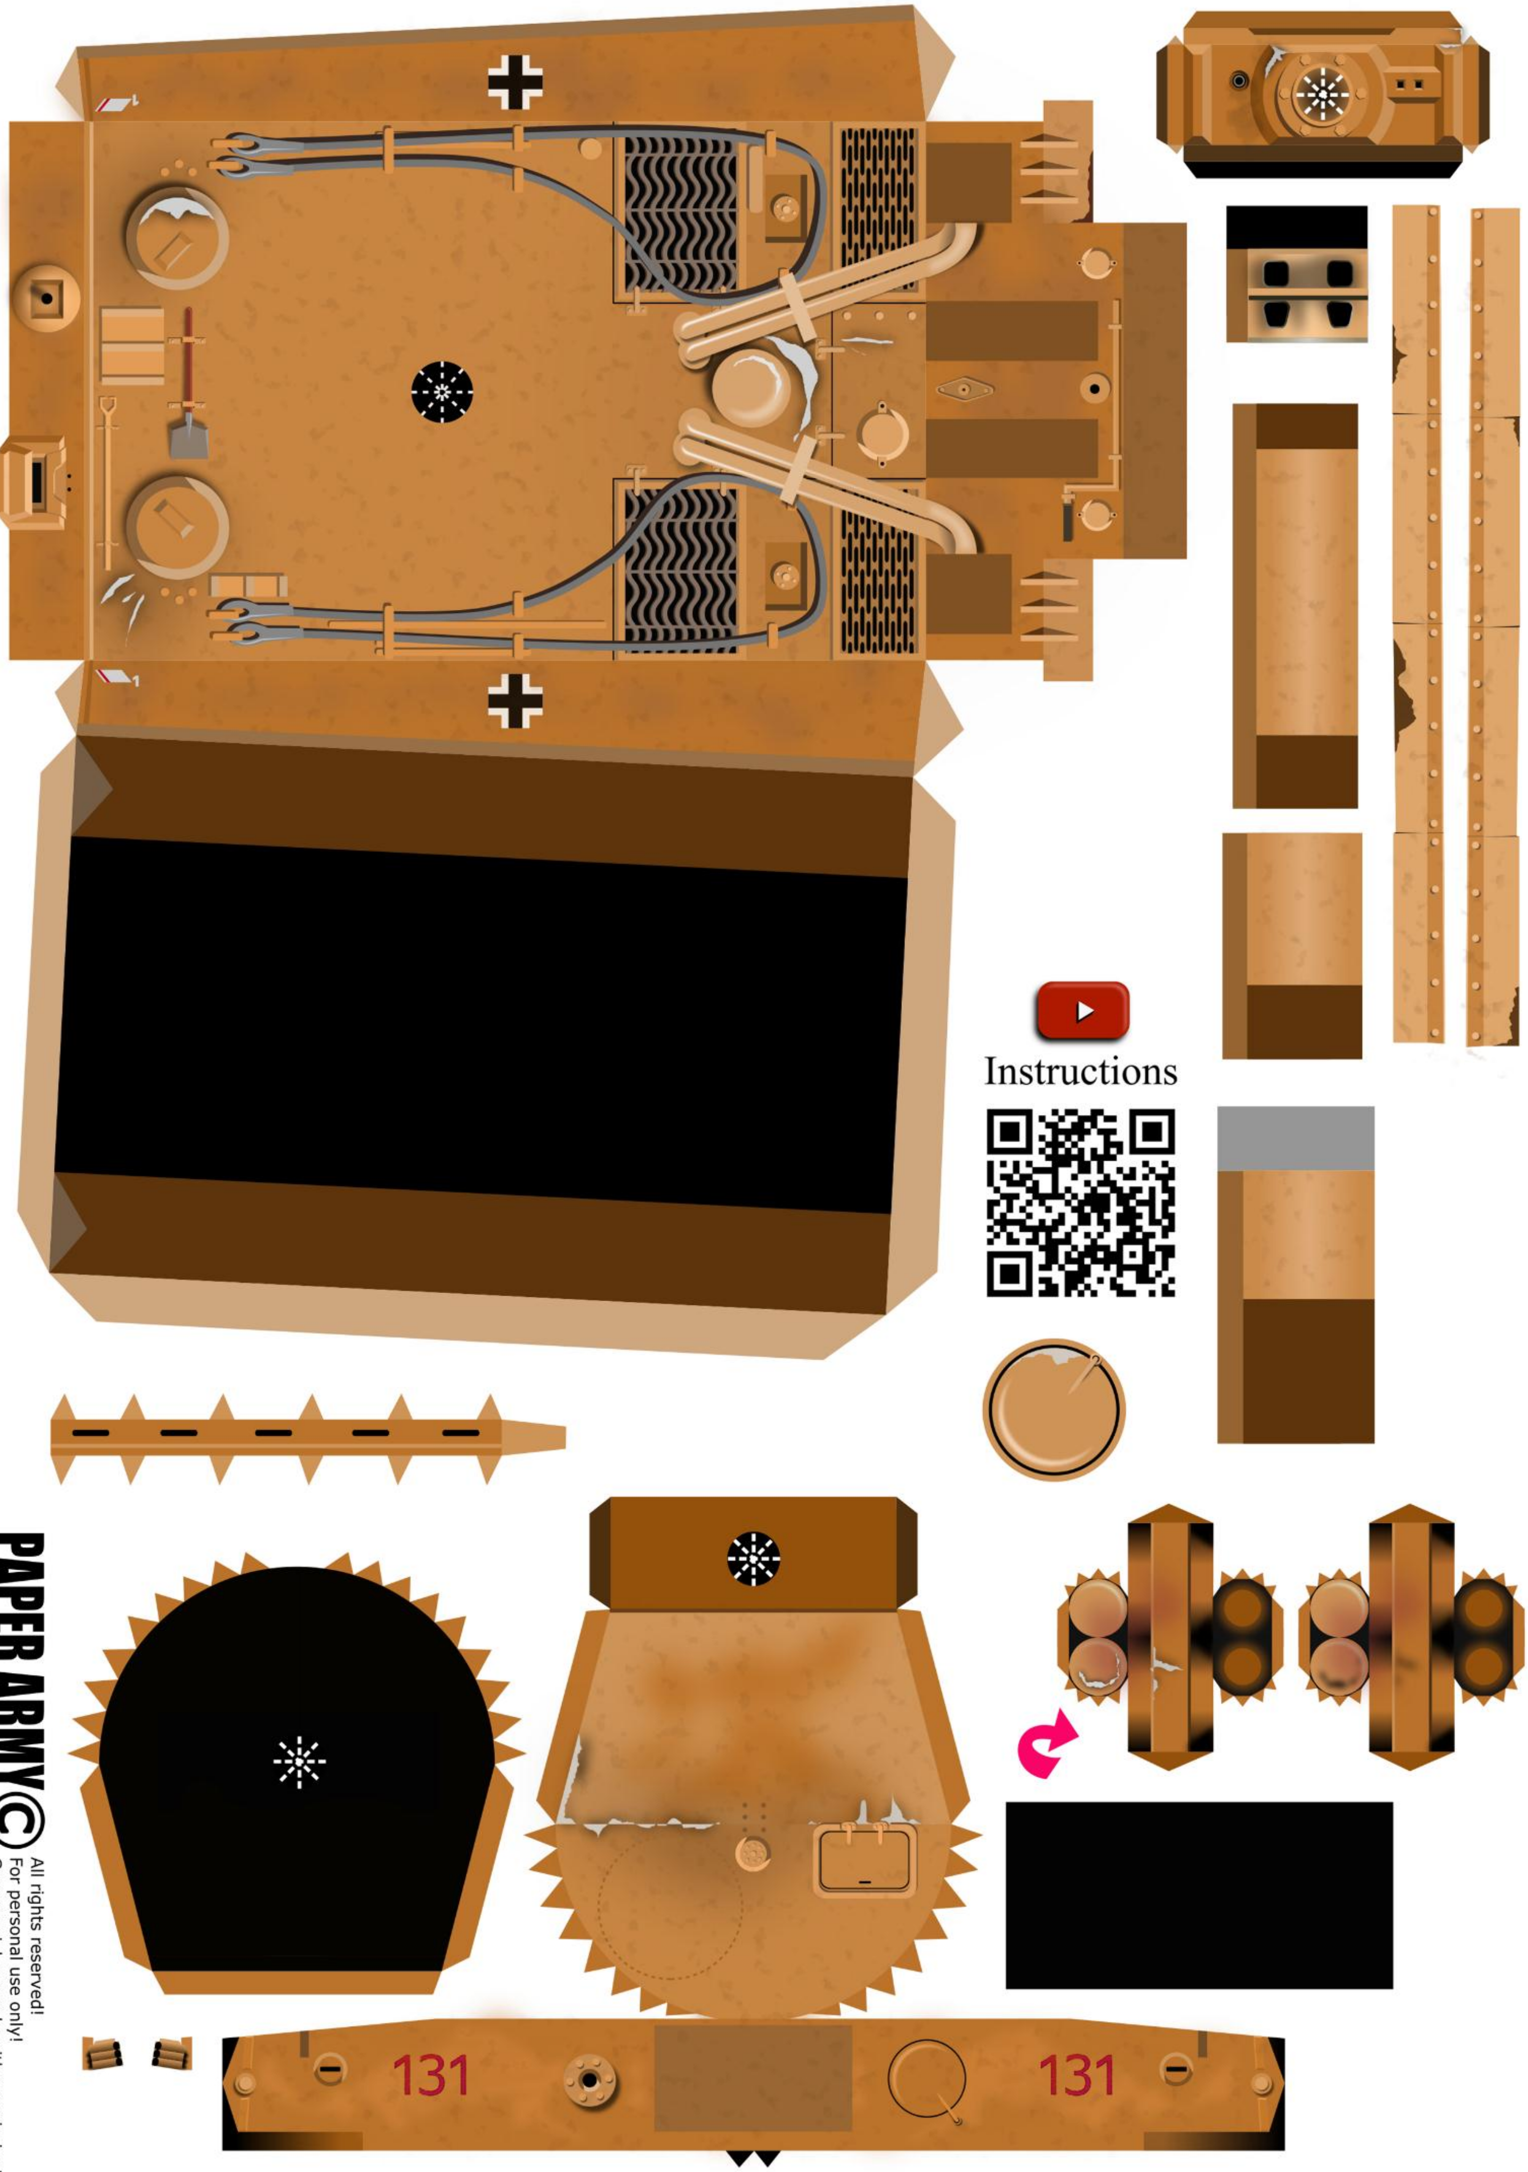

All models are free, but they are created with difficulty to support the author of the models and the "Paper Army" channel watch the video on this link to the end - "Video Review of the Tiger 131 Paper Tank", this is a video with a review of the assembled the same model of the tank You downloaded, with epic music, watching the video to the end, like and commenting will help the channel in promoting and other lovers of collecting paper models will see the video and also come to the channel - this is the best support, thanks;)

I create everything on a PC in a vector graphics and 3D program, here is a video on the drawing process, if interested - "How do I draw models of tanks"
